Team members present:

- Gia
- Thành
- Thịnh
- Kiên
- Huyền

Team members absent: None

1. Agenda & Objective

- Review lessons learned from the previous sprint and identify areas for improvement.
- Finalize descriptions for the AI features.
- Discuss creating a separate GitHub repository for documentation.
- Formulate the task breakdown and assign initial Jira tickets.

2. Sprint Goal

- Finalize the documentation repository workflow, complete UI/UX specifications and initial interface components for the key features, and ensure 100% of sprint deliverables are tracked via Jira.

3. Discussion & Key Decisions

Discussion of PA1 Results

After viewing the TA's grade for PA1, the team discussed potential reasons for points deducted. Upon review, the team agreed that the deduction was due to missing documentation in the GitHub repository.

Creation of Doc Repository

To avoid losing points for missing documentation in future sprints, the team agreed to create a new repository dedicated to documentation and specifications. Gia is responsible for creating this repository, and each team member will make commits based on their assigned tasks for each sprint.

Finalization of AI Features

The descriptions of the AI features were finalized before the end of Sprint 1. The goal of this discussion was to ensure all team members were aligned with the AI team's plans. The discussion covered potential UI designs, usage mechanics, and user flows.

4. Task Breakdown

All tasks were logged on Jira with explicit deadlines, creation dates, and assigned team members. For the detailed task log, please refer to the attached `Jira.csv` file.

Below is the list of team members and their corresponding Jira usernames:

- Nguyễn Hoàng Gia: *Gia Gia*
- Lê Đức Thịnh: *Lê Đức Thịnh*
- Trịnh Văn Thành: *tvt8421*
- Nguyễn Công Kiên: *Kiên Nguyễn Công*
- Phan Thị Thanh Huyền: *Huyen*
